Dr. Landon J. Getz (PhD) is a Postdoctoral Fellow in the Maxwell Lab at the University of Toronto's Department of Biochemistry. Dr. Getz obtained his Ph.D. in Microbiology and Immunology at Dalhousie University in the lab of Dr. Nikhil Thomas, studying *Vibrio* genetics and host-pathogen interactions. Dr. Getz is a CIHR Fellow (2023), Vanier Scholar (2019), Killam Laureate (2019), and an alumnus of the Chief Science Advisor's inaugural youth council (2020).

Dr. Getz has a keen interest in understanding the genetic mechanisms of bacterial-environmental survival and the genetic and molecular mechanisms of pathogenesis and phage-predation in *Vibrio* species. This work is supported by the Emerging & Pandemic Infections Consortium (EPIC) inaugural GlaxoSmithKline Convergence Postdoctoral Fellowship in Antimicrobial Resistance (2023) and a CIHR Fellowship (2023). Dr. Getz previously explored the pathogenicity and environmental survival of multiple pathogens, including *Vibrio parahaemolyticus*, and Enteropathogenic and Enterohemorrhagic *E. coli*.

Dr. Getz is deeply interested in the intersections between science and society and therefore pursues the ethical and policy implications of new and emerging medical and genetic technologies, such as CRISPR/Cas. Consequently, Dr. Getz has published several peer-reviewed journal articles and commentaries on both microbial genetics and pathogenesis, as well as in bioethics and science policy.

Teaching and Course-Design Experience

TEACHING PHILOSOPHY

"The ultimate goal of farming is not the growing of crops, but the cultivation and perfection of human beings."

- Masanobu Fukuoka, Farmer and Philosopher

As an educator, I consider teaching to be like farming. As settlers, both sides of my family have farmed land in Canada they moved onto as part of the colonization of The West. Reflecting on this profession and on my family's experiences has given me significant guidance in my teaching career thus far. In line with how Mr. Fukuoka understands the goals of farming, I believe that education's ultimate goal is the cultivation and advancement of human beings. With that in mind, my teaching philosophy broadly covers three areas:

**Nuturing Students to grow,
Fostering Diversity and Inclusivity, and
Building Social Good through Education**
